NCERT-FIRST BOOK RECOMMENDATIONS

Standards 1 to 10 | India | 2026-27 reference edition

A practical guide to selecting official NCERT textbooks by grade and subject, with reading plans and language-aware recommendations for families and support teams.

200 grade-subject guide pages are included after this introduction. Titles are listed as bibliographic recommendations only; no textbook content is reproduced.

Prepared 16 October 2026

How to use this guide

This guide is limited to NCERT publications, as requested. It is an orientation and discovery aid, not a substitute for the school’s book list. NCERT publishes textbooks in multiple languages and updates editions. Before purchasing, verify grade, subject, language, course/stream, part number, reprint and current session on the official NCERT textbook portal.

Language choice in the support application

When a family asks for a book but does not specify a language, the Academic Specialist should use MCP elicitation to ask which language they prefer. After the user answers, the agent should filter the catalogue by grade, subject, session and language. If the application cannot elicit input, it should ask a short follow-up question instead of guessing.

Recommendation labels

Official NCERT textbook: a title published by NCERT and discoverable through its official catalogue or textbook portal. School confirmation needed: a title, language edition or volume that could not be verified as the prescribed 2026-27 school edition from the official page during preparation. Integrated area: a learning area that may not have a separate textbook at that grade.

Copyright and access

This guide names books and links to official resources. It does not copy chapters, images, exercise questions or textbook pages. NCERT states that its textbooks are copyrighted and sets limits on republication and redistribution; use the official portal for reading and download terms.

What this guide can and cannot claim

The current official NCERT catalogue is session-specific. The NCERT portal offers textbooks across Grades I-XII and in English, Hindi and Urdu; language availability can differ by title and grade. The 2026-27 catalogue is the appropriate primary reference for the current session.

This guide uses the 2026-27 session as its edition label. Some named titles have direct official NCERT support in the sources listed at the end. For titles whose grade edition, parts or language version may have changed, the recommendation deliberately says to verify the current catalogue. This is safer than treating an older edition as current.

The listed title is a starting point, not a claim that every CBSE school prescribes it. Schools may use a different subject combination, language course, edition or approved set of materials. Grades 1-2 may integrate environmental themes; Arts and Physical Education are commonly activity-led. Ask the school before buying a separate book for these areas.

How to read a recommendation record

Each grade-subject record has four pages: (1) recommended NCERT starting point and verification status; (2) grade-appropriate learning focus; (3) a practical reading and study routine; and (4) family checks and a short book-selection checklist. This creates a consistent record format for a future catalogue and MCP book-lookup tool.

Standard 1 | English | Recommendation record

Recommended NCERT starting point

Mridang (Class I)

Grade	1
Subject area	English
School stage	Foundational stage
Recommendation status	Official NCERT title identified; confirm current session, language and edition.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 1, the useful first check is the current NCERT publication for english. It is the most direct way to match the learner’s school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school’s current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Official lookup: https://ncert.nic.in/textbook.php | Session catalogue: https://ncert.nic.in/list-publication.php?ln=en

Standard 1 | English | What the learner practises

Learning focus for this grade

Oral language, listening, picture-supported reading, phonics and early writing.

At Standard 1, this area belongs to the foundational stage. A useful recommendation should match the learner's current class, language of instruction and the way the school teaches the subject. Use the prescribed NCERT title to anchor learning, then let the teacher decide which chapters and activities are in scope.

Learning signals to look for

• The learner can explain one idea from the current unit in their own words.

• The learner can connect an example in the book to home, school or local surroundings.

• The learner can identify a question they still have, rather than only memorising a line.

• The learner can revisit an earlier idea when a later lesson depends on it.

For early grades, keep sessions short and conversational. In middle and secondary grades, invite the learner to compare examples, show working or cite a page/section when explaining an answer.

Standard 1 | English | A workable reading routine

Four-week use plan

Week 1 - Preview

Look at the chapter headings, pictures, examples and questions. Ask what the learner already knows and write down two questions.

Week 2 - Read together

Read a short section, pause for the learner to explain it, and note unfamiliar words. Use the official book’s activities as directed by the teacher.

Week 3 - Practise

Return to one example or activity. Ask the learner to try it independently, explain their approach, then check against the book or teacher guidance.

Week 4 - Reflect

Ask the learner to summarise the idea, name what remains confusing, and choose a question to ask in class. Do not race ahead of the school sequence.

Keep notes brief: chapter or topic, date, one success, and one question. These notes help the teacher recommend the next suitable reading level without assuming that more books are always better.

Standard 1 | English | Family and school checks

Before recommending or purchasing

Grade: Does the cover/catalogue identify the learner's exact standard?

Subject: Does the title match the school's subject name and course?

Language: Has the family chosen a preferred language? If not, ask through MCP elicitation before presenting a language-specific title.

Session and edition: Does the school list match the session, reprint, part and edition?

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 1 english book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 1 | Hindi | Recommendation record

Recommended NCERT starting point

Sarangi (Class I)

Grade	1
Subject area	Hindi
School stage	Foundational stage
Recommendation status	Official NCERT title identified; confirm current session, language and edition.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 1, the useful first check is the current NCERT publication for hindi. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school's current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Official lookup: https://ncert.nic.in/textbook.php | Session catalogue: https://ncert.nic.in/list-publication.php?ln=en

Standard 1 | Hindi | What the learner practises

Learning focus for this grade

Listening and speaking, letter-sound links, familiar words and shared reading.

At Standard 1, this area belongs to the foundational stage. A useful recommendation should match the learner’s current class, language of instruction and the way the school teaches the subject. Use the prescribed NCERT title to anchor learning, then let the teacher decide which chapters and activities are in scope.

Learning signals to look for

• The learner can explain one idea from the current unit in their own words.

• The learner can connect an example in the book to home, school or local surroundings.

• The learner can identify a question they still have, rather than only memorising a line.

• The learner can revisit an earlier idea when a later lesson depends on it.

For early grades, keep sessions short and conversational. In middle and secondary grades, invite the learner to compare examples, show working or cite a page/section when explaining an answer.

Standard 1 | Hindi | A workable reading routine

Four-week use plan

Week 1 - Preview

Look at the chapter headings, pictures, examples and questions. Ask what the learner already knows and write down two questions.

Week 2 - Read together

Read a short section, pause for the learner to explain it, and note unfamiliar words. Use the official book’s activities as directed by the teacher.

Week 3 - Practise

Keep notes brief: chapter or topic, date, one success, and one question. These notes help the teacher recommend the next suitable reading level without assuming that more books are always better.

Standard 1 | Hindi | Family and school checks

Before recommending or purchasing

Grade: Does the cover/catalogue identify the learner's exact standard?

Subject: Does the title match the school's subject name and course?

Language: Has the family chosen a preferred language? If not, ask through MCP elicitation before presenting a language-specific title.

Session and edition: Does the school list match the session, reprint, part and edition?

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 1 hindi book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 1 | Mathematics | Recommendation record

Recommended NCERT starting point

Joyful Mathematics (Class I)

Grade	1
Subject area	Mathematics
School stage	Foundational stage
Recommendation status	Official NCERT title identified; confirm current session, language and edition.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 1, the useful first check is the current NCERT publication for mathematics. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school's current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Official lookup: https://ncert.nic.in/textbook.php | Session catalogue: https://ncert.nic.in/list-publication.php?ln=en

Standard 1 | Mathematics | What the learner practises

Learning focus for this grade

Number sense, counting, shapes, patterns and everyday problems.

At Standard 1, this area belongs to the foundational stage. A useful recommendation should match the learner's current class, language of instruction and the way the school teaches the subject. Use the prescribed NCERT title to anchor learning, then let the teacher decide which chapters and activities are in scope.

Learning signals to look for

• The learner can explain one idea from the current unit in their own words.

• The learner can connect an example in the book to home, school or local surroundings.

• The learner can identify a question they still have, rather than only memorising a line.

• The learner can revisit an earlier idea when a later lesson depends on it.

Before recommending or purchasing

Grade: Does the cover/catalogue identify the learner's exact standard?

Subject: Does the title match the school's subject name and course?

Language: Has the family chosen a preferred language? If not, ask through MCP elicitation before presenting a language-specific title.

Session and edition: Does the school list match the session, reprint, part and edition?

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 1 mathematics book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 1 | Integrated world learning | Recommendation record

Recommended NCERT starting point

No separate title confirmed; ask the school whether learning is integrated or uses a prescribed reader.

Grade	1
Subject area	Integrated world learning
School stage	Foundational stage
Recommendation status	School/catalogue confirmation required before purchase.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 1, the useful first check is the current NCERT publication for integrated world learning. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school's current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Official lookup: https://ncert.nic.in/textbook.php | Session catalogue: https://ncert.nic.in/list-publication.php?ln=en

Standard 1 | Integrated world learning | What the learner practises

Learning focus for this grade

Family, school, nature, health and the local community through conversation and observation.

At Standard 1, this area belongs to the foundational stage. A useful recommendation should match the learner's current class, language of instruction and the way the school teaches the subject. Use the prescribed NCERT title to anchor learning, then let the teacher decide which chapters and activities are in scope.

Learning signals to look for

• The learner can explain one idea from the current unit in their own words.

• The learner can connect an example in the book to home, school or local surroundings.

• The learner can identify a question they still have, rather than only memorising a line.

• The learner can revisit an earlier idea when a later lesson depends on it.

For early grades, keep sessions short and conversational. In middle and secondary grades, invite the learner to compare examples, show working or cite a page/section when explaining an answer.

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 1 integrated world learning book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 1 | Arts and wellbeing | Recommendation record

Recommended NCERT starting point

Use teacher-selected activity materials; confirm whether the school prescribes a current NCERT arts/PE title.

Grade	1
Subject area	Arts and wellbeing
School stage	Foundational stage
Recommendation status	School/catalogue confirmation required before purchase.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 1, the useful first check is the current NCERT publication for arts and wellbeing. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school's current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Keep notes brief: chapter or topic, date, one success, and one question. These notes help the teacher recommend the next suitable reading level without assuming that more books are always better.

Standard 2 | Mathematics | Family and school checks

Before recommending or purchasing

Grade: Does the cover/catalogue identify the learner's exact standard?

Subject: Does the title match the school's subject name and course?

Language: Has the family chosen a preferred language? If not, ask through MCP elicitation before presenting a language-specific title.

Session and edition: Does the school list match the session, reprint, part and edition?

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 2 mathematics book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 2 | Integrated world learning | Recommendation record

Recommended NCERT starting point

No separate title confirmed; ask the school whether learning is integrated or uses a prescribed reader.

Grade	2
Subject area	Integrated world learning
School stage	Foundational stage
Recommendation status	School/catalogue confirmation required before purchase.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 2, the useful first check is the current NCERT publication for integrated world learning. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school's current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Official lookup: https://ncert.nic.in/textbook.php | Session catalogue: https://ncert.nic.in/list-publication.php?ln=en

Standard 2 | Integrated world learning | What the learner practises

Learning focus for this grade

Family, school, nature, health and the local community through conversation and observation.

At Standard 2, this area belongs to the foundational stage. A useful recommendation should match the learner's current class, language of instruction and the way the school teaches the subject. Use the prescribed NCERT title to anchor learning, then let the teacher decide which chapters and activities are in scope.

Learning signals to look for

• The learner can explain one idea from the current unit in their own words.

• The learner can connect an example in the book to home, school or local surroundings.

• The learner can identify a question they still have, rather than only memorising a line.

• The learner can revisit an earlier idea when a later lesson depends on it.

For early grades, keep sessions short and conversational. In middle and secondary grades, invite the learner to compare examples, show working or cite a page/section when explaining an answer.

Standard 2 | Integrated world learning | A workable reading routine

Four-week use plan

Week 1 - Preview

Look at the chapter headings, pictures, examples and questions. Ask what the learner already knows and write down two questions.

Week 2 - Read together

Read a short section, pause for the learner to explain it, and note unfamiliar words. Use the official book’s activities as directed by the teacher.

Week 3 - Practise

Return to one example or activity. Ask the learner to try it independently, explain their approach, then check against the book or teacher guidance.

Week 4 - Reflect

Ask the learner to summarise the idea, name what remains confusing, and choose a question to ask in class. Do not race ahead of the school sequence.

Keep notes brief: chapter or topic, date, one success, and one question. These notes help the teacher recommend the next suitable reading level without assuming that more books are always better.

Standard 2 | Integrated world learning | Family and school checks

Before recommending or purchasing

Grade: Does the cover/catalogue identify the learner's exact standard?

Subject: Does the title match the school's subject name and course?

Language: Has the family chosen a preferred language? If not, ask through MCP elicitation before presenting a language-specific title.

Session and edition: Does the school list match the session, reprint, part and edition?

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 2 integrated world learning book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 2 | Arts and wellbeing | Recommendation record

Recommended NCERT starting point

Use teacher-selected activity materials; confirm whether the school prescribes a current NCERT arts/PE title.

Grade	2
Subject area	Arts and wellbeing
School stage	Foundational stage
Recommendation status	School/catalogue confirmation required before purchase.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 2, the useful first check is the current NCERT publication for arts and wellbeing. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

Grade	4
Subject area	Mathematics
School stage	Preparatory stage
Recommendation status	School/catalogue confirmation required before purchase.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 4, the useful first check is the current NCERT publication for mathematics. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school's current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Official lookup: https://ncert.nic.in/textbook.php | Session catalogue: https://ncert.nic.in/list-publication.php?ln=en

Standard 4 | Mathematics | What the learner practises

Learning focus for this grade

Operations, fractions, measurement, geometry and data in context.

At Standard 4, this area belongs to the preparatory stage. A useful recommendation should match the learner’s current class, language of instruction and the way the school teaches the subject. Use the prescribed NCERT title to anchor learning, then let the teacher decide which chapters and activities are in scope.

Learning signals to look for

• The learner can explain one idea from the current unit in their own words.

• The learner can connect an example in the book to home, school or local surroundings.

• The learner can identify a question they still have, rather than only memorising a line.

• The learner can revisit an earlier idea when a later lesson depends on it.

For early grades, keep sessions short and conversational. In middle and secondary grades, invite the learner to compare examples, show working or cite a page/section when explaining an answer.

Standard 4 | Mathematics | A workable reading routine

Four-week use plan

Week 1 - Preview

Look at the chapter headings, pictures, examples and questions. Ask what the learner already knows and write down two questions.

Week 2 - Read together

Read a short section, pause for the learner to explain it, and note unfamiliar words. Use the official book’s activities as directed by the teacher.

Week 3 - Practise

Return to one example or activity. Ask the learner to try it independently, explain their approach, then check against the book or teacher guidance.

Week 4 - Reflect

Ask the learner to summarise the idea, name what remains confusing, and choose a question to ask in class. Do not race ahead of the school sequence.

Keep notes brief: chapter or topic, date, one success, and one question. These notes help the teacher recommend the next suitable reading level without assuming that more books are always better.

Standard 4 | Mathematics | Family and school checks

Before recommending or purchasing

Grade: Does the cover/catalogue identify the learner's exact standard?

Subject: Does the title match the school's subject name and course?

Language: Has the family chosen a preferred language? If not, ask through MCP elicitation before presenting a language-specific title.

Session and edition: Does the school list match the session, reprint, part and edition?

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 4 mathematics book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 4 | Environmental studies | Recommendation record

Recommended NCERT starting point

Our Wondrous World - current Class IV edition; verify title and edition in the 2026-27 catalogue.

Grade	4
Subject area	Environmental studies
School stage	Preparatory stage
Recommendation status	School/catalogue confirmation required before purchase.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 6 english book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 6 | Hindi | Recommendation record

Recommended NCERT starting point

Malhar (Grade 6)

Grade	6
Subject area	Hindi
School stage	Middle stage
Recommendation status	Official NCERT title identified; confirm current session, language and edition.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 6, the useful first check is the current NCERT publication for hindi. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school's current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Official lookup: https://ncert.nic.in/textbook.php | Session catalogue: https://ncert.nic.in/list-publication.php?ln=en

Standard 6 | Hindi | What the learner practises

Learning focus for this grade

Paragraphs, grammar in context and retelling ideas.

At Standard 6, this area belongs to the middle stage. A useful recommendation should match the learner’s current class, language of instruction and the way the school teaches the subject. Use the prescribed NCERT title to anchor learning, then let the teacher decide which chapters and activities are in scope.

Learning signals to look for

• The learner can explain one idea from the current unit in their own words.

• The learner can connect an example in the book to home, school or local surroundings.

• The learner can identify a question they still have, rather than only memorising a line.

• The learner can revisit an earlier idea when a later lesson depends on it.

For early grades, keep sessions short and conversational. In middle and secondary grades, invite the learner to compare examples, show working or cite a page/section when explaining an answer.

Standard 6 | Hindi | A workable reading routine

Four-week use plan

Week 1 - Preview

Look at the chapter headings, pictures, examples and questions. Ask what the learner already knows and write down two questions.

Week 2 - Read together

Read a short section, pause for the learner to explain it, and note unfamiliar words. Use the official book’s activities as directed by the teacher.

Week 3 - Practise

Return to one example or activity. Ask the learner to try it independently, explain their approach, then check against the book or teacher guidance.

Week 4 - Reflect

Ask the learner to summarise the idea, name what remains confusing, and choose a question to ask in class. Do not race ahead of the school sequence.

Keep notes brief: chapter or topic, date, one success, and one question. These notes help the teacher recommend the next suitable reading level without assuming that more books are always better.

Standard 6 | Hindi | Family and school checks

Before recommending or purchasing

Grade: Does the cover/catalogue identify the learner's exact standard?

Subject: Does the title match the school's subject name and course?

Language: Has the family chosen a preferred language? If not, ask through MCP elicitation before presenting a language-specific title.

Session and edition: Does the school list match the session, reprint, part and edition?

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 7 social science book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 8 | English | Recommendation record

Recommended NCERT starting point

Poorvi (Grade 8); verify current volume in the NCERT portal.

Grade	8
Subject area	English
School stage	Middle stage
Recommendation status	School/catalogue confirmation required before purchase.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 8, the useful first check is the current NCERT publication for english. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school's current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Official lookup: https://ncert.nic.in/textbook.php | Session catalogue: https://ncert.nic.in/list-publication.php?ln=en

Standard 8 | English | What the learner practises

Learning focus for this grade

Longer texts, inference, organised writing and subject vocabulary.

At Standard 8, this area belongs to the middle stage. A useful recommendation should match the learner’s current class, language of instruction and the way the school teaches the subject. Use the prescribed NCERT title to anchor learning, then let the teacher decide which chapters and activities are in scope.

Learning signals to look for

• The learner can explain one idea from the current unit in their own words.

• The learner can connect an example in the book to home, school or local surroundings.

• The learner can identify a question they still have, rather than only memorising a line.

• The learner can revisit an earlier idea when a later lesson depends on it.

For early grades, keep sessions short and conversational. In middle and secondary grades, invite the learner to compare examples, show working or cite a page/section when explaining an answer.

Standard 8 | English | A workable reading routine

Four-week use plan

Week 1 - Preview

Look at the chapter headings, pictures, examples and questions. Ask what the learner already knows and write down two questions.

Week 2 - Read together

Read a short section, pause for the learner to explain it, and note unfamiliar words. Use the official book’s activities as directed by the teacher.

Week 3 - Practise

Return to one example or activity. Ask the learner to try it independently, explain their approach, then check against the book or teacher guidance.

Week 4 - Reflect

Ask the learner to summarise the idea, name what remains confusing, and choose a question to ask in class. Do not race ahead of the school sequence.

Keep notes brief: chapter or topic, date, one success, and one question. These notes help the teacher recommend the next suitable reading level without assuming that more books are always better.

Standard 8 | English | Family and school checks

Before recommending or purchasing

Grade: Does the cover/catalogue identify the learner's exact standard?

Subject: Does the title match the school's subject name and course?

Language: Has the family chosen a preferred language? If not, ask through MCP elicitation before presenting a language-specific title.

Session and edition: Does the school list match the session, reprint, part and edition?

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 8 english book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 8 | Hindi | Recommendation record

Recommended NCERT starting point

Malhar (Grade 8); verify current volume in the NCERT portal.

Grade	8
Subject area	Hindi
School stage	Middle stage
Recommendation status	School/catalogue confirmation required before purchase.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 8, the useful first check is the current NCERT publication for hindi. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 9 science book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 9 | Social science | Recommendation record

Recommended NCERT starting point

Understanding Society: India and Beyond (Grade 9; verify current volume and school list).

Grade	9
Subject area	Social science
School stage	Secondary stage
Recommendation status	School/catalogue confirmation required before purchase.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 9, the useful first check is the current NCERT publication for social science. It is the most direct way to match the learner's school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school's current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.

Official lookup: https://ncert.nic.in/textbook.php | Session catalogue: https://ncert.nic.in/list-publication.php?ln=en

Standard 9 | Social science | What the learner practises

Learning focus for this grade

Introduce people, places, rules and shared life through age-appropriate inquiry.

At Standard 9, this area belongs to the secondary stage. A useful recommendation should match the learner’s current class, language of instruction and the way the school teaches the subject. Use the prescribed NCERT title to anchor learning, then let the teacher decide which chapters and activities are in scope.

Learning signals to look for

• The learner can explain one idea from the current unit in their own words.

• The learner can connect an example in the book to home, school or local surroundings.

• The learner can identify a question they still have, rather than only memorising a line.

• The learner can revisit an earlier idea when a later lesson depends on it.

For early grades, keep sessions short and conversational. In middle and secondary grades, invite the learner to compare examples, show working or cite a page/section when explaining an answer.

Standard 9 | Social science | A workable reading routine

Four-week use plan

Week 1 - Preview

Look at the chapter headings, pictures, examples and questions. Ask what the learner already knows and write down two questions.

Week 2 - Read together

Read a short section, pause for the learner to explain it, and note unfamiliar words. Use the official book’s activities as directed by the teacher.

Week 3 - Practise

Return to one example or activity. Ask the learner to try it independently, explain their approach, then check against the book or teacher guidance.

Week 4 - Reflect

Ask the learner to summarise the idea, name what remains confusing, and choose a question to ask in class. Do not race ahead of the school sequence.

Keep notes brief: chapter or topic, date, one success, and one question. These notes help the teacher recommend the next suitable reading level without assuming that more books are always better.

Standard 9 | Social science | Family and school checks

Before recommending or purchasing

Grade: Does the cover/catalogue identify the learner's exact standard?

Subject: Does the title match the school's subject name and course?

Language: Has the family chosen a preferred language? If not, ask through MCP elicitation before presenting a language-specific title.

Session and edition: Does the school list match the session, reprint, part and edition?

Source: Can the family verify it on the official NCERT portal or through the school?

Need: Is this an assigned text, a supplementary official NCERT resource, or an optional reading? State which.

Suggested clarification for the support agent

"Which language would you prefer for the Standard 9 social science book? If you know the academic session or your school has shared a book list, please include that too."

If the title or edition cannot be verified, say so plainly and provide the NCERT catalogue link. Do not turn a general NCERT recommendation into a claim that the book is mandatory for a particular school.

Standard 10 | English | Recommendation record

Recommended NCERT starting point

Use the Grade 10 English textbook listed for the school’s current course in the NCERT catalogue.

Grade	10
Subject area	English
School stage	Secondary stage
Recommendation status	Official NCERT title identified; confirm current session, language and edition.
Language	Ask the learner/family; confirm the matching official edition in the NCERT catalogue.

Why this is the starting point

For Standard 10, the useful first check is the current NCERT publication for english. It is the most direct way to match the learner’s school stage to the official grade-level resource. Do not infer that a similar title from another grade or an old edition is interchangeable.

The family should verify the exact title, medium, course, part number and reprint against the school’s current list. If the school uses a state or school-specific book in addition to NCERT, record it separately; this guide intentionally does not recommend non-NCERT publishers.
